DAVIT CRANES

Made in the USA 

THERN DAVIT CRANES TOWER ABOVE THE REST

VERSATILE

Thern offers "long-lift" options for all their crane models to satisfy almost any situation where there is a need for lifts from 500 lbs (226 kg) up to 3,000 lbs (1360 kg) and up to 475 ft., (144 m) below floor. Simple installation allows for mounting on roof tops, trucks, boats, docks, silos, towers, mezzanines and more. Many models have adjustable boom length and heights which allows for clearance of most obstructions. Whether it is for permanent or temporary installation, davit cranes are a popular choice across many industries and applications because of their affordable, versatility.

AFFORDABLE

Thern davit cranes offer a convenient, portable and economical alternative to more expensive methods such as tower cranes, mobile cranes or boom trucks. In most cases a davit crane will pay for itself in one or two uses vs mobile crane rental.

DURABLE

Thern davit cranes are rugged and built to last. Thern cranes come with standard red enamel or powder coat finishes. For added protection against the elements, selected models are available with epoxy coating, galvanized, 304 or 316 stainless steel finishes. Custom colors are also available.

WINCH ONE IS FOR YOU?

Depending upon the load weight, dimensions, hook height needed above or below floor level, hook reach required, long or short load lifts, spur gear or worm gear hand or power operated winches, AC/DC or pneumatic, our experts will help you choose the perfect davit and winch combination to handle your load. Let us help make your job faster, safer and easier with the use of the best davit crane available today - And they're Made in the USA.
